

IMPORTANT WORK NOTICE

ROOSEVELT ISLAND BRIDGE RECONSTRUCTION PROJECT

THE ROOSEVELT ISLAND BRIDGE PEDESTRIAN SIDEWALK WILL BE RELOCATED ON OR ABOUT MONDAY, DECEMBER 3, 2007

Beginning on or about Monday, December 3, 2007, the New York City Department of Transportation, Division of Bridges will begin performing the temporary relocation of the pedestrian sidewalk of the Roosevelt Island Bridge.

An alternate pedestrian path will be located on the Roosevelt Island Bridge roadway in which concrete barriers will provide safety by separating pedestrians from vehicular traffic. In addition, two ADA compliant ramps will be constructed to mitigate the height differential between the sidewalk and the roadway.

This closure is necessary for the building of the containment system for painting activities.

This relocation will be in place for approximately three months, until painting activities conclude.

NYCDOT appreciates your patience and understanding as we proceed with this important reconstruction effort.

Please contact the Community Liaison, Ms. Tiffany Asberry, with questions or concerns. She may be reached at 212-758-1060.
